

What's This?

Enterprise Education

Activities and partnerships which happen throughout the school and the community, designed to give students relevant knowledge and skills to deal with the 'real' world.

Curriculum

The eight areas of learning.

Pastoral Care

Teachers looking out for the physical and mental well-being of your child.

Collaboration

Indesmart's teachers meet regularly to share ideas and planning.

Outcomes Focus

Desirable, achievable and assessable levels of learning.

Smart Groups

Indesmart's

Years 4-6

Enterprise Education

Establishing enterprise attributes with independent research skills

Indesmarts are continually striving for better Literacy and Numeracy skills and also aim to develop the independent research skills that are necessary in later schooling.

Indesmarts are encouraged to be curious and to take an active interest in seeking answers.

Teachers will direct them towards answers. This allows the Indesmarts to progress to learning independent and relevant research skills.

Indesmarts research work involves the wider community and often focuses on environmental issues.

Indesmarts will be involved in excursions where they learn more about their local history and environment. The focus is also on teamwork, cooperation and developing independence.

Indesmarts have also taken part in a project where they researched and designed aids to assist seniors. Indesmarts have developed a relationship with local tourism businesses and created and designed new promotional posters.

Indesmarts are involved with the local Home and Community Care organisation and participate in their annual community games.
